What made you become a tattoo artist..

With a father (Greg Orié) being a tattooer even before i was born
With seeing all the great Tattoos at Dragon Tattoo I already knew at very young age i wanted to become one of the real men that are called tattooers and exactly that is what keeps me to push further and further to become one of them

What has been your best tattoo to date..

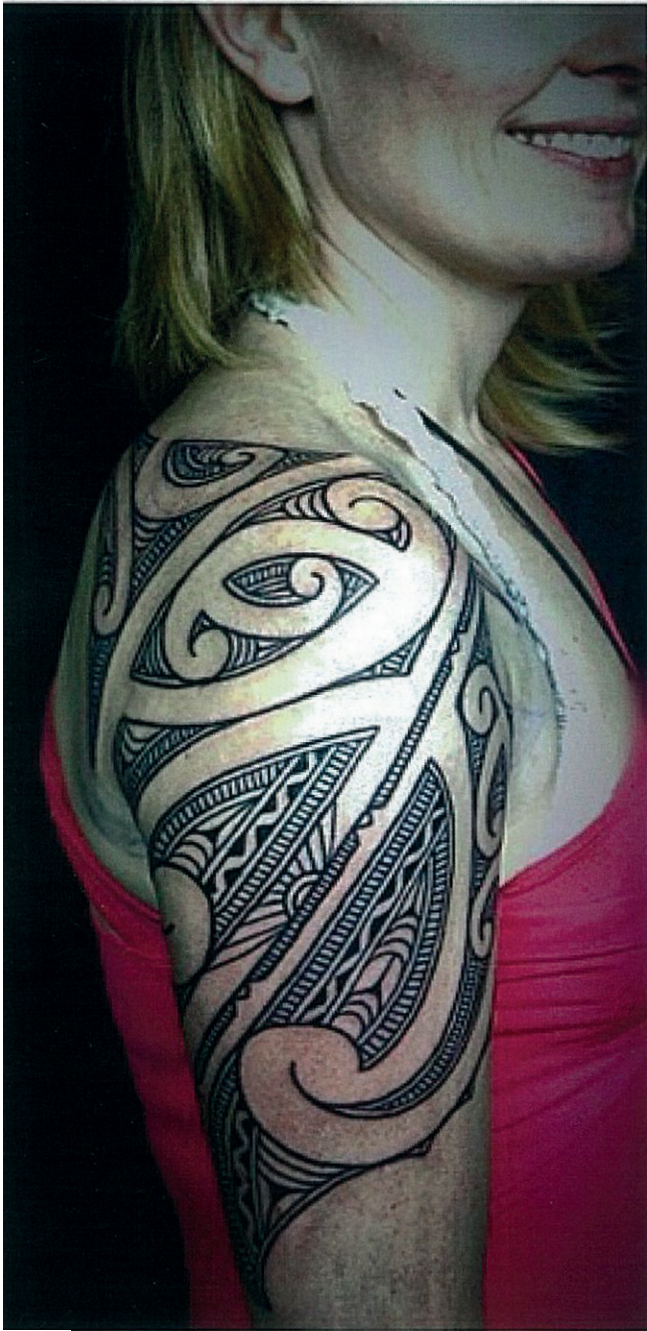

Uhm there are always some favorites ofcourse (even if is not your best one) So i would have to say my best tattoo is going to be the next one

Do you work in any other art forms other than tattooing..

For me there is no other form this is the only thing that i can Sometimes i do some sketching on paper as preparation for tattooing Although they look better on skin than paper

Are you working any conventions or guest spots in 2016

I don't have any guestspots planned i will be working on the londonconvention(England) ,brussel(Belgium) and aachen (Germany)

Who are you inspired by..

Ah shit thats so many people to begin with as i try to get inspired by everything i see I will give it a try Starting with my father Greg Orie (now known as Orie Lightning) Jeroen Franken ,Rob Deut ,Croc , Calen Paris ,Leo Zuluetta , Chris Higgins ,Inia Taylor Gordon Toi ,Dimitry Babakhin Also i am very inspired by lots off tattooers doing good old school ,japanese and all other real tattoo styles Such as Amar Gouchem ,Valerie Vargas , Stewart Robson , Sascha Sevic , Jan Netten ,Dave De Crom,Tycho Veldhoen,Kian Forreal and many many others (also people that do shit tattoos) I am also inspired by my grand father Piet Buis for being a down to earth hard working man doing his passion for refurbishing for more than 65 years And all people i ever worked with from cleaning help ,floormangers and ofcourse customers Last but certainly not least my wife and kids

Where do you see the tattoo

industry in the next 5 years time. The industry will keep on growing with even more tv shows and such wich is good I am not so busy with the whole industry thing I focus on my tattooing and the position Dragon Tattoo is going to have in that industry And the only way to keep up in whatever industry is focus on what u do

What machines and inks do you use..

I mostly use rotaries just because i like the weight and my ink ? As long as its black i am fine
